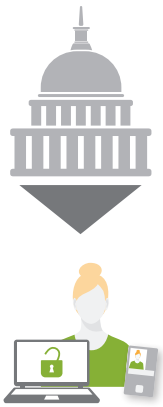
SureID Certified™ PIV-I



A managed Personal Identity Verification – Interoperable (PIV-I) credential for government contractors needing access to the federal bridge and compliance with government mandates.

For government contractors, this streamlined identity solution can integrate with an organization's critical infrastructure and enable multifactor authentication. A PIV-I card can help federal contractors achieve NIST SP 800-171 compliance.

HOW IT WORKS

Register

Provides automated registration and issuance process to reduce credential management burden on organizations

Prove Identity

Identity proofs registrants with trusted in-peson ID verification process

Credential

Helps organizations meet mandates with HSPD-12 compliant credential

Enable

Enables single credential for logical (computer) and physical (building) security by integrating PIV-I into existing systems

** Price subject to change*

TRUSTED PIV-I EXPERTS

SureID, Inc. is a U.S. federal government-approved level of assurance 4 (LOA-4) identity provider for PIV-I credentials, which is the highest assurance level as defined by the National Institute of Standards and Technology (NIST). Trusted by the U.S. military for over a decade, SureID is the leading PIV-I issuer in the nation with more than 190,000 credentials issued to date.

SureID PIV-I Credentials

- HSPD-12 compliant credential
- Federal Bridge cross certification for interoperability and function
- Automated registration process that reduces burden on organizations
- Trusted ID verification process
- Identity proofing of registrant

PIV-I & Public Key Infrastructure (PKI)

SureID PIV-I credentials are issued at the highest level of identity assurance. By leveraging Public Key Infrastructure (PKI), our credentials allow applications and systems to electronically trust digital identities. Through a partnership with Axiad IDS, SureID PIV-I credentials can integrate into your organization's Physical Access Control Systems (PACS) providing for a single, strong identity credential for both logical and physical access systems. PIV-I also supports encryption and digital signatures for email communications to protect sensitive information and to provide non-repudiation. SureID PIV-I enables your organization to meet federal guidelines such as NIST SP 800-171 and FICAM.

SureID Certified PIV-I Offers:	
Trusted digital identity	✓
Access/compliance management	✓
Biometric data	✓
Identification verification	✓
Smart card	✓
Helps comply with federal mandates	✓
Configurable solution	✓
Digital signature and encryption	✓
