

## **SureID Announces Release of SureID-Remote, Version 2.2**

*SureID extends user convenience by adding plug and play compatibility with Siemens Integrated Mouse/Finger Scan Device*

**Mullica Hill, New Jersey – February 10, 2003** – SureID, the leader in providing plug and play biometric solutions to protect the IT infrastructure, announces the Release of Version 2.2 of their flagship product **SureID-Remote**. **SureID-Remote** provides customers with a strong, 3-factor biometric solution for guarding access to corporate networks over VPN connections. Biometric access provides an authentication method that is both stronger and more convenient than passwords, PIN's, tokens or Smart Cards. Major Enhancements to **SureID-Remote** include:

- Increased user convenience and comfort with support for Siemens ID Mouse.
- Support for Check Point SecureClient / SecuRemote FP2/FP3 and OpSec SAA Version 2.

“Our customers have enjoyed the ease of deployment, increased productivity, and unparalleled biometric security provided by SureID-Remote”, stated Phil Bochey, VP of Sales & Marketing. “Now we’ve enhanced the comfort and convenience of using SureID products by providing device support for the Siemens ID Mouse”.

“As one of the top-selling desktop biometric devices on the market, the Siemens ID Mouse can provide a user friendly experience in several security solutions," said Stefan Kuhn, General Manager at Siemens Biometrics. "The demand for top-level security is constantly increasing. Our product, in conjunction with SureID applications offers users ultimate security & convenience in an economical and compact package”

### **About SureID**

**SureID** is a market leading provider of User and Identity Management solutions. Using the latest in Biometric technology, **SureID** secures all points of access to critical Corporate Information with an authentication method that is both stronger and more convenient than passwords, PIN's, tokens or Smart Cards. Delivering security solutions since 1985, the SureID team consists of information and security veterans with decades of experience delivering enterprise security. These solutions are used by the defense industry and Fortune 1000 Companies including: Checkpoint Systems, Target, SAP America, Unisys, Wells Fargo, American Greetings, FMC Chemical, and Jason Roberts. The SureID product suite leverages patent pending BIO3 and BIKE impenetrable biometric security technologies to provide a scalable, reliable, plug-and-play strong authentication solution. **About Siemens**

Siemens is one of the world's major developers and manufacturers of biometric systems and components. The company has many years of experience in the field, having embarked on the basic research into biometric identification in the late 1970s. The world's first fingerprint sensors were developed in the Siemens research laboratories in 1997. Siemens is now the leading provider of fingerprint-scanning systems and components for the business and consumer sectors.
