

## **SureID Achieves OPSEC Certification from Check Point Software**

*SureID-Professional plugs and plays with  
Industry's Most Recognized Security Framework*

**Mullica Hill, New Jersey – July 8, 2002** – SureID, the leader in plug-and-play biometric solutions, today announced that it has achieved OPSEC® (Open Platform for Security) certification for SureID-Professional, from Check Point Software Technologies Ltd. (NASDAQ: CHKP), the worldwide leader in securing the Internet. Through OPSEC certification, SureID-Professional seamlessly integrates with Check Point's Next Generation VPN-1®/FireWall-1® solution.

SureID-Pro extends the industry leading Check Point VPN-1 / FireWall-1 security infrastructure with the strongest authentication method possible – BIOMETRICS. With SureID-Pro there is nothing to forget or lose, and self-service enrollment eliminates administrative headaches. SureID breaks the price barrier and installs seamlessly in minutes by tightly integrating with Check Point's award winning VPN-1 SecuRemote® and SecureClient® products. The integrated solutions allows customers to reduce costs, protect identities, perform non-repudiation, and comply with regulatory requirements like HIPAA and CFR Part 11, with a fully interoperable, secure, and reliable solution from SureID, for Check Point.

“We are very pleased to provide a plug-and-play strong Biometric authentication solution that is Check Point OPSEC certified,” stated Steve Casey, President. “Our customers have enjoyed the ease of deployment, increased productivity, and unparalleled biometric security provided by SureID-Pro. Now they can be assured that SureID products seamlessly integrate with the Check Point security environment today and in the future.”

“Biometric authentication provides an extremely high level of authentication that many industry regulations now require,” said Upesh Patel manager, OPSEC Alliance for Check Point Software Technologies. “Through the OPSEC interfaces, the SureID-Pro provides Check Point VPN-1/FireWall-1 customers with the flexibility to easily implement a cost effective and scalable biometric security solution.”

A freely downloadable trial version of SureID-Pro is available at [www.SureID.com](http://www.SureID.com) and <http://www.opsec.com/solutions/partners/sureid.html>

### **About Check Point's OPSEC**

OPSEC (Open Platform for Security) is the industry's open, multi-vendor security framework. With over 300 partners, OPSEC guarantees customers the broadest choice of best-of-breed integrated applications and deployment platforms that support Check Point's Secure Virtual Network Architecture. Products that carry the OPSEC Certified seal have been tested to guarantee integration and interoperability. For complete OPSEC

Alliance program information, including partner and product listings, the freely available OPSEC SDK (software development kit) and evaluation versions of OPSEC Certified products, visit <http://www.opsec.com>.

### **About SureID**

SureID is a recognized leader in Identity Management and is known for its reliable and proven plug and play security products. Delivering security solutions since the 1980s, the SureID team consists of information and physical security veterans with decades of experience delivering enterprise security. Those solutions are used by the defense industry and Fortune 1000 including Checkpoint Systems, Target, SAP America, Unisys, Wells Fargo, American Greetings, FMC Chemical, and Jason Roberts. The SureID product suite leverages our patent pending BIO3 and BIKE impenetrable biometric security technologies to provide a scalable, reliable and plug-and-play strong authentication solution. Visit [www.sureid.com](http://www.sureid.com) for product information, industry solution sets, and freely downloadable trial software.
